DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Vowles'437 et al.

The Vowles'437 et al. reference discloses a bubble generating device (see Figure 3) comprising a reservoir (proximate reference numeral 56 in Fig. 3), a bubbler conduit (proximate reference numeral 82 and 83 in Fig. 3) which carries an airstream that adds up to define a first and second air stream (83,84), an exit outlet (proximate reference numeral 80 in Fig. 3), an updraft chimney (proximate reference numeral 85 in Fig. 3), and a lift passageway 62. In regard to claims 9-11, the method as claimed would be inherent during the normal use and operation of the device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Quinn, Jr. et al and Wister references pertain to other bubble producing devices with associated frothing features.

Art Unit: 3751

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-20 are allowed.
